Enhanced reading tools and user functionality for multi-modality breast imaging

Merge PACS™ and Mammography

Mammographers have to balance the review of growing volumes of breast imaging studies—mammography, ultrasound and MRI—with workflow solutions that often are not optimized for efficient multi-modality review. As your organization strives to perform breast imaging with the greatest accuracy and efficiency, it's imperative to leverage a solution with mammography-specific features, tailored to your unique practice, patients and workflow needs.

Merge PACS arms providers with innovative workflows to manage the flow of studies in local, remote, disparate and teleradiology environments. With Merge PACS you can:

Address workflows all-in-one, including a full-service mammography solution

Leverage a highly modular and flexible workflow that allows physicians to automate the launch of specialty viewers and enables multiple workflows to coexist natively and simultaneously

Efficiently review breast imaging studies

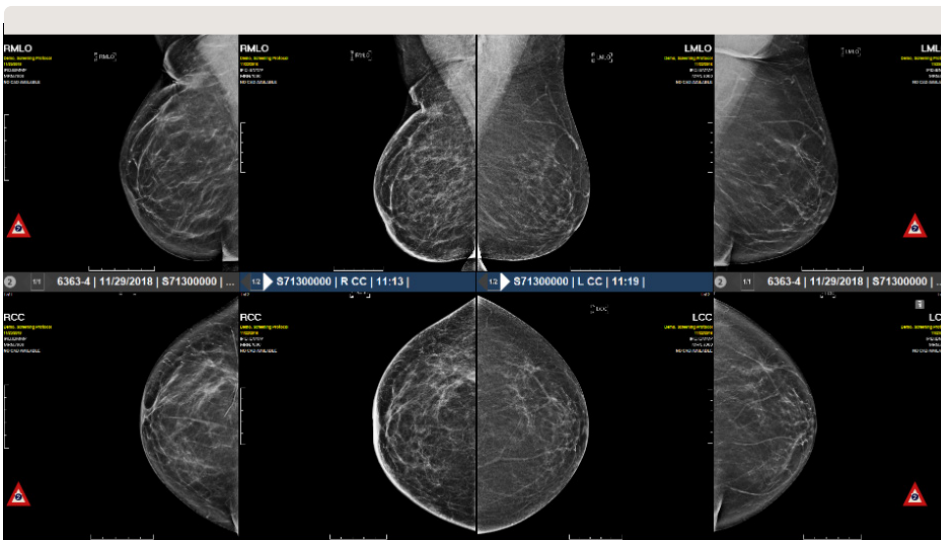

Evaluate mammograms with confidence, precision, and efficiency via features including:

- Single click access to iCAD Profound AI and Hologic Genius AI insights
- Enhanced zoom, to quickly zoom in and out while keeping the chest wall aligned to the viewport
- Stack scroll, enabling instant access to all priors of the same view
- Binocular (paired or single)
- Hot light

- Dual link magnifier
- Dual invert
- Wall to wall orientation
- Synchronized quadrant zooming
- Default keyboard shortcuts

Customize hanging protocols to your preference

Quickly and easily create intuitive hanging protocols for any situation. Create once and easily modify using the advanced rules engine in Merge PACS

Related radiology solutions

Merge CADstream®
Improve MRI study analysis and reporting with automated and standardized processing.

Merge Workflow Orchestrator*
A cloud-native SaaS to orchestrate a multi-modality breast imaging workflow.

Merge VNA*
A vendor neutral archive (VNA) to support an enterprise imaging strategy.

Merge Universal Viewer
A diagnostic quality, zero-download image and XDS viewer for anyone who requires access to images.

Merge RIS™
A fully-featured outpatient radiology information system (RIS), designed to meet your practice needs, including breast imaging and Meaningful Use.
