

DATA SHEET

A cloud-native SaaS for an intelligently orchestrated reading experience

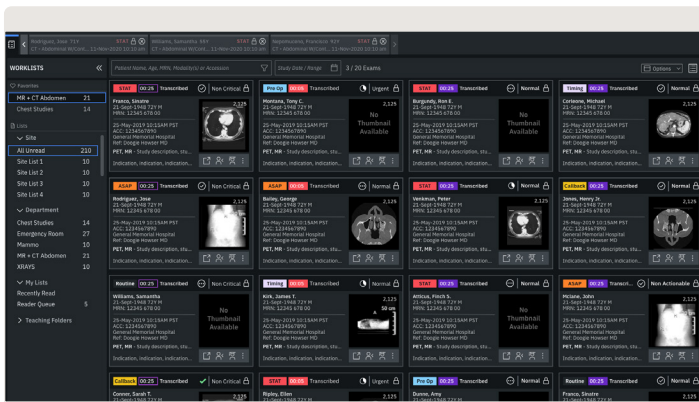

Merge Workflow Orchestrator

Radiologists' workloads are skyrocketing. They have more and more studies to read and data to review, but are using outdated workspaces that do not provide an effective or modern user experience. The result is that radiologists are constantly interrupting their reading activities, searching for insights behind the data, juggling between multiple applications, and creating ad-hoc processes that complicate their workflow. They deserve a better reading environment — they deserve an orchestrated radiology workflow.

How Merative™ can help

Merge Workflow Orchestrator is a workflow solution that consolidates studies, patient data, and AI results all in one insightful modern interface to give physicians a head start in their reading activities. Built to support advanced hybrid environments, this cloud-native SaaS also helps IT leaders to optimize the flow of studies, safely linking data and tools that run on-premises and in the cloud to reading experts anywhere in the enterprise and beyond.

Aimed to increase the velocity of care without the cost of accuracy, Merge Workflow Orchestrator:

Streamlines reading workflows
See studies, relevant patient data, AI insights, and communications with your care team all in one modern reading interface that caters to radiologists as professionals as much as it does to them as connected modern individuals.

Infuses AI results directly into the workspace
Build a broader understanding of the patient's case with insights from favorite AI applications displayed directly into the radiologist's workspace along with their processing status in real-time.

Drives the flow of data
Consolidate all reading work into a single worklist and balance the physicians' workload automatically with a comprehensive rule-based engine that takes many inputs including results from AI analyses. Among them, Merative provides to organizations a native non-clinical AI that analyzes reading workloads across the enterprise in order to add equity to the distribution of studies.

Controls the journey to the cloud and the CapEx-to-OpEx ratio
Connect data and systems deployed on-premises and in the cloud today, and decide over time where to run imaging capabilities with Merative's hybrid technologies.

About Merge

Merge medical imaging solutions, offered by Merative, combine intelligent, scalable imaging workflow tools with deep and broad expertise to help healthcare organizations improve their confidence in patient outcomes and optimize care delivery.
