

## MICROMEDEX CORE CAPABILITY

# Neonatal and pediatric content

Small doses, big impact: Micromedex has your little ones covered

Neonatal and pediatric content, one of the core capabilities of Micromedex, provides precise dosing and evidence-based clinical information for neonatal and pediatric patients. The neonatal content (supplied by NeoFax) and pediatric content enables clinicians to make informed decisions and deliver high-quality care to the smallest patients, helping to improve outcomes and reduce risk of adverse outcomes.

## Highlights

### Access on-the-go:

The mobile app provides access to full drug monograph and infant formula content on smart devices or tablets.

### User-friendly interface:

Easily navigate the database and access neonatal and pediatric drug content through separate monographs, within the same interface.

### Comprehensive & specialized content:

The database is regularly updated with the latest evidence-based information for neonatal and pediatric patients on medication management, nutrition, enteral nutrition, adverse effects, and more.

Micromedex was ranked as Best in KLAS 2023 for clinical decision support: point-of-care clinical reference. Micromedex is a market-leading solution that can help the entire care team be more confident in their decisions, supporting the highest level of patient care.

# Features and benefits of neonatal and pediatric content

## Population-specific drug information

Provides evidence-based drug monographs with an off-label focus for safe and effective drug therapy in neonatal and pediatric patients.

## Patient-specific dosing calculators

Safely calculate drug dosage for each medication in the system, with age- and indication-specific features that provide weight-based dosing recommendations and evidence-based guidance on dose, concentration, and administration.

An additional safety feature includes the indication-based dosing calculators associated with each medication. This clinical decision support feature quickly provides clinicians with dosage options for each patient and alerts them of out-of-range values to reduce the risk of dosing errors.

## About Micromedex

Micromedex by Merative is trusted by healthcare professionals across 70 countries to provide award-winning clinical decision support solutions for drug and disease information and patient education. Micromedex was named Best in KLAS 2023 (clinical decision support: point of care clinical reference), is recognized as a CMS compendium, and is accredited by NICE for its robust editorial process.

## Enteral nutrition support

Supporting the nutritional health and well-being of neonatal and pediatric patients, the enteral formula database allows for easy comparison of multiple products, enabling selection of the most appropriate nutritional support product. It contains valuable information about infant formulas and human milk fortifiers.

## Peace of mind when it matters most

Building on the 35+ year history and reputation of NeoFax, neonatal and pediatrics content provides trusted, evidence-based drug information for neonatal and pediatric patients. Its comprehensive editorial processes ensure accuracy, guided by published literature, clinical guidelines, and regulatory information.

## Mobile app essentials

Full drug monograph and infant formula content available 24/7 with smart device or tablet. Download both apps today.
