merative™

Your Trials.
Your Choice.

Zelta Data Integration

Your trials require bespoke combinations of technology to maximize efficiency. Integrate third party data sources with ease by leveraging Merative's industry-leading, open and connected Zelta™ clinical trials platform.

Inbound data migration without programming

– Reduce timelines for data imports from diverse sources such as labs, endpoint adjudications, rescue studies and more

– Eliminate custom development and replace with point-andclick data mappings

– Reduce quality assurance (QA) time through design integration

– Deploy studies quickly without involving the programming team

– Create on-demand, scheduled and recurring data import jobs

– In-study monitoring tool to identify and resolve integration issues

Outbound integration with clinical development solutions

– Share the Zelta clinical trials platform data with third party solutions of your choice, including CTMS, eTMF, eConsent, drug safety, and QRBM

– Plug and Play support connectors and templates to further facilitate the configuration of data exchange between systems

– Utilize familiar point-and-click data mappings

Data integration training program

– Learn about the core data integration capabilities of the Zelta clinical trials platform

– Master study using actual study requirements

– Learn how to import a wide variety of data types into the Zelta clinical trials platform
